

Perth Transport Futures Project

Phase 1 - A9/A85 Junction Improvement and Link Road to Bertha Park

PUBLIC NOTICE - FOOTPATH / CYCLE ROUTE CLOSURE – NCR77

Balfour Beatty has recently commenced construction of the A9/A85 Junction Improvement and link road to Bertha Park. This project includes construction of a new A9/A85 junction with slip roads, a new link road to Bertha Park and a new footbridge over the A9 to Inveralmond Industrial Estate.

In order to safely construct the new junction and the new bridge across the Almond, it will be necessary to temporarily close a section of the NCR77 cycle route and footpath at this location. This closure will be in place until summer 2018.

A short temporary diversion has been constructed around the works as shown, left, to ensure continued operation of this cycle route and footpath.

Perth and Kinross Council and Balfour Beatty apologise for the inconvenience caused while this much needed improvement is constructed.

If you would like further information on this project please contact Perth & Kinross using the details provided below.
